thorntons-property.co.uk

Thorntons is a trading name of Thorntons Law LLP

Property address	28 Arbrite Road Durdee DDL GNR
Seller(s)	Thomtons
Completion date of property	20/9/17

Note for sellers

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the date of entry for the sale of your house, tell your solicitor or estate agent immediately.

Information to be given to prospective buyer(s)

1.	Length of ownership	0	
	How long have you owned the property?	1997	
2.	Council tax		77
	Which Council Tax band is your property in? (Please tick)		
	A B C D E F G H	" + know	
3.	Parking		'ii w
	What are the arrangements for parking at your property? (Please tick all that apply)		
	• Garage		
	Allocated parking space		
	• Driveway		
	Shared parking		
	On street		
	Resident permit		
	Metered parking		
	Other (please specify):		
4.	Conservation area		
	Is your property in a designated Conservation Area (that is an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?	Yes No Don't know	
5.	Listed buildings		
	Is your property a Listed Building, or contained within one (that is a building recognised and approved as being of special architectural or historical interest)?	Yes No	
6.	Alterations/additions/extensions		
a.	(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?	Yes No	

	if you have answered yes, please describe below the changes which you have made:		
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work? If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking. If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:	Yes No N/A	
b.	Have you had replacement windows, doors, patio doors or double glazing installed in your property? If you have answered yes, please answer the three questions below:	Yes No Don't Thurk	
	(i) Were the replacements the same shape and type as the ones you replaced?	Yes No	
	(ii) Did this work involve any changes to the window or door openings?	Yes No	
	(iii) Please describe the changes made to the windows doors, or approximate dates when the work was completed): Please give any guarantees which you received for this work to estate agent.		1
7.	Central heating		
a.	Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property — the main living room, the bedroom(s), the hall and the bathroom).	Yes No Partial Not suc	
	If you have answered yes or partial – what kind of central heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas warm air). If you have answered yes, please answer the three questions	There are storage heat lat not sur They're com	المال المال
	i) When was your central heating system or partial central heating system installed?	es centre de	

	(ii) Do you have a maintenance contract for the central heating system?	Yes No	
	if you have answered yes, please give details of the company with which you have a maintenance contract:		
	(iii) When was your maintenance agreement last renewed? (Please provide the month and year).		
8.	Energy Performance Certificate		V
	Does your property have an Energy Performance Certificate which is less than 10 years old?	Yes No	
9.	Issues that may have affected your property		
a.	Has there been any storm, flood, fire or other structural damage to your property while you have owned it?	Yes No	
	If you have answered yes, is the damage the subject of any outstanding insurance claim?	Yes No	
b.	Are you aware of the existence of asbestos in your property?		
	If you have answered yes, please give details:	Yes No	

10.	Services	1			
a. Ple supplie	ase tick which services are er:	connected to your pro	perty and give d	etails of the

b.	Is there a septic tank syst If you have answered yes below:	Yes No			
	(i) Do you have appropriate consents for the discharge from your septic tank?				
	(ii) Do you have a maintenance contract for your septic tank? If you have answered yes, please give details of the company with which you have a maintenance contract:				
11.	Responsibilities for share	7. T.Y.L. 18 T. S.		3.11	
a.	Are you aware of any responsibility to contribute to the cost of anything used jointly, such as the repair of a shared drive, private road, boundary, or garden area?				
	If you have answered yes,	please give details:			
b.	Is there a responsibility to the roof, common stairwel If you have answered yes,	Yes No Don't know			
c.	Has there been any major repair or replacement of any part of the roof during the time you have owned the property?			Yes No	

d.	Do you have the right to walk over any of your neighbours' property — for example to put out your rubbish bin or to maintain your boundaries?	Yes No	
	If you have answered yes, please give details:	NIA	-
e.	As far as you are aware, do any of your neighbours have the right to walk over your property, for example to put out their rubbish bin or to maintain their boundaries?	Yes No	
	If you have answered yes, please give details:	,0	
f.	As far as you are aware, is there a public right of way across any part of your property? (public right of way is a way over which the public has a right to pass, whether or not the land is privately-owned.)	Yes No	
	If you have answered yes, please give details:		
12.	Charges associated with your property		- F
a.	Is there a factor or property manager for your property?	Yes	
	If you have answered yes, please provide the name and address, and give details of any deposit held and approximate charges:	No	4
b.	Is there a common buildings insurance policy?	Yes	
	If you have answered yes, is the cost of the insurance included in your monthly/annual factor's charges?	No Don't know	
C.	Please give details of any other charges you have to pay on a regul upkeep of common areas or repair works, for example to a resident maintenance or stair fund.	ar basis for the s' association, o	or
13.	Specialist works		10.4
a.	As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your property?	Yes No	
	If you have answered yes, please say what the repairs were for, whether you carried out the repairs (and when) or if they were done before you bought the property.		
	As far as you are aware, has any preventative work for dry rot, wet rot, or damp ever been carried out to your property?	Yes No	
b.	If you have answered yes, please give details:		

	If you have answered yes to 13(a) or (b), or guarantees relating to this work? If you have answered yes, these guarantee purchaser and should be given to your second to the second sec	oy the	Yes No

Energy Performance Certificate (EPC)

Dwellings

Scotland

2/1, 28 ARBROATH ROAD, DUNDEE, DD4 6EP

Dwelling type: Top-floor flat
Date of assessment: 14 September 2017
Date of certificate: 14 September 2017

Total floor area: 54 m²

Primary Energy Indicator: 570 kWh/m²/year

Reference number: 3213-6521-6000-0644-1996

Type of assessment: RdSAP, existing dwelling

Approved Organisation: Elmhurst

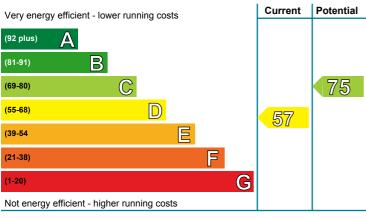

Main heating and fuel: Electric storage heaters

You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO₂ emissions by improving your home

Estimated energy costs for your home for 3 years*	£3,015	See your recommendations
Over 3 years you could save*	£1,335	report for more information

^{*} based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

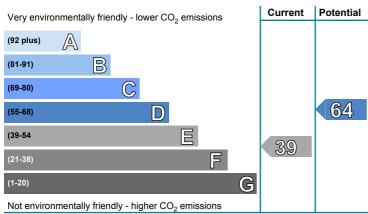

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band D (57)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO₂) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band E (39)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years	Available with Green Deal
1 Internal or external wall insulation	£4,000 - £14,000	£951.00	⊘
2 High heat retention storage heaters	£1,200 - £1,800	£381.00	⊘

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

The Green Deal may allow you to make your home warmer and cheaper to run at no up-front capital cost. See your recommendations report for more details.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Sandstone or limestone, as built, no insulation (assumed)	***	***
	Solid brick, as built, no insulation (assumed)	****	***
Roof	Pitched, 270 mm loft insulation	****	★★★★ ☆
Floor	(another dwelling below)	_	_
Windows	Fully double glazed	***	***
Main heating	Electric storage heaters	***	****
Main heating controls	Manual charge control	***	***
Secondary heating	Room heaters, electric	_	_
Hot water	Electric immersion, off-peak	***	***
Lighting	Low energy lighting in 83% of fixed outlets	****	****

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO₂ emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 96 kg CO₂/m²/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 5.2 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 2.4 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£1,977 over 3 years	£1,011 over 3 years	
Hot water	£897 over 3 years	£528 over 3 years	You could
Lighting	£141 over 3 years	£141 over 3 years	save £1,335
Totals	£3,015	£1,680	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

December ded management		lu dia etima a a et	Typical saving	Rating after improvement		Green
Re	commended measures	Indicative cost	per year	Energy	Environment	Deal
1	Internal or external wall insulation	£4,000 - £14,000	£317	C 70	D 55	
2	High heat retention storage heaters and dual immersion cylinder	£1,200 - £1,800	£127	C 75	D 64	②

Measures which have a green deal tick of are likely to be eligible for Green Deal finance plans based on indicative costs. Subsidy also may be available for some measures, such as solid wall insulation. Additional support may also be available for certain households in receipt of means tested benefits. Measures which have an orange tick may need additional finance. To find out how you could use Green Deal finance to improve your property, visit www.greenerscotland.org or contact the Home Energy Scotland hotline on 0808 808 2282.

Alternative measures

There are alternative improvement measures which you could also consider for your home. It would be advisable to seek further advice and illustration of the benefits and costs of such measures.

- Biomass boiler (Exempted Appliance if in Smoke Control Area)
- · Air or ground source heat pump

Choosing the right improvement package

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Internal or external wall insulation

Internal or external wall insulation involves adding a layer of insulation to either the inside or the outside surface of the external walls, which reduces heat loss and lowers fuel bills. As it is more expensive than cavity wall insulation it is only recommended for walls without a cavity, or where for technical reasons a cavity cannot be filled. Internal insulation, known as dry-lining, is where a layer of insulation is fixed to the inside surface of external walls; this type of insulation is best applied when rooms require redecorating. External solid wall insulation is the application of an insulant and a weather-protective finish to the outside of the wall. This may improve the look of the home, particularly where existing brickwork or rendering is poor, and will provide long-lasting weather protection. Further information can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk). It should be noted that planning permission might be required and that building regulations apply to this work so it is best to check with your local authority whether a building warrant or planning permission will be required.

2 High heat retention storage heaters

Modern storage heaters have better insulation and are easier to control than the older type in this property. Ask for a quotation for new, high heat retention heaters with automatic charge and output controls. A dual-immersion cylinder, which can be installed at the same time, will provide cheaper hot water than the system currently installed. Installations should be in accordance with the current regulations covering electrical wiring. Ask the heating engineer to explain the options, which might also include switching to other forms of electric heating.

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present: There are none provided for this home

Your home's heat demand

You could receive Renewable Heat Incentive (RHI) payments and help reduce carbon emissions by replacing your existing heating system with one that generates renewable heat and, where appropriate, having your loft insulated and cavity walls filled. The estimated energy required for space and water heating will form the basis of the payments. For more information go to www.energysavingtrust.org.uk/scotland/rhi.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	6,634	N/A	N/A	(3,358)
Water heating (kWh per year)	3,166			

Addendum

This dwelling has stone walls and so requires further investigation to establish whether these walls are of cavity construction and to determine which type of wall insulation is best suited.

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

Opportunity to benefit from a Green Deal on this property

Under a Green Deal, the cost of the improvements is repaid over time via a credit agreement. Repayments are made through a charge added to the electricity bill for the property.

To see which improvements are recommended for this property, please turn to page 3. You can choose which improvements you want to install and ask for a quote from an authorised Green Deal provider. They will organise installation by an authorised Green Deal installer. If you move home, the responsibility for paying the Green Deal charge under the credit agreement passes to the new electricity bill payer.

For householders in receipt of income-related benefits, additional help may be available.

To find out more, visit www.greenerscotland.org or call 0808 808 2282.

Date of inspection

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property¹.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in the expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

¹ Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions. The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:-

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report ² will be from information contained in the Report and the generic Mortgage Valuation Report.

² Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;

- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller:
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2. Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 3. Category 1: No immediate action or repair is needed.

WARNING:

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value, the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	Purpose built second floor left/east flat forming part of a three storey end terraced tenement.
Accommodation	SECOND FLOOR : Entrance Hallway, Lounge, Two Bedrooms, Kitchen and Shower Room with WC.
Gross internal floor area (m²)	54 sq. metres or thereby.
Neighbourhood and location	Situated three quarters of a mile north east of Dundee city centre fronting a busy section of Arbroath Road near its junction with Princes Street and Albert Street. Surrounding properties are of a mixed residential and commercial nature, and at ground floor level within the tenement are commercial premises currently trading as an opticians, hair salon and bakers. Excellent primary facilities are available within the immediate vicinity.
Age	Erected around 1900.
Weather	Dry and bright.
Chimney stacks	None.
Roofing including roof space	Sloping roofs were visually inspected with the aid of binoculars where appropriate. Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so. The roof is of pitched timber construction externally clad in slates with zinc ridging.

	The roof void has been divided over the flats/common stairwell with plasterboard to meet fire regulations. Only a limited head and shoulders inspection was possible of the roof void over the subject flat via a hatch within the hallway due to the extent of insulation laid over the joists and only a head and shoulders inspection was possible of the small void over the mutual stairwell. No access was gained to the west attic as this is via a separate private flatted dwelling.
Rainwater fittings	Visually inspected with the aid of binoculars where appropriate.
	PVC gutters and downpipes.
Main walls	Visually inspected with the aid of binoculars where appropriate.
	Foundations and concealed parts were not exposed or inspected.
	The main walls are approximately 660 mm solid stone externally harled to the rear and gable.
Windows, external doors and joinery	Internal and external doors were opened and closed where
Trinuono, oxioniai acore ana jemery	keys were available.
	Random windows were opened and closed where possible.
	Doors and windows were not forced open.
	Windows are predominantly timber casement double glazed H-style with a more modern uPVC double glazed wood grain unit in the kitchen.
	The entrance door is of timber flush panel design.
External decorations	Visually inspected.
	Painter work finish to external timbers.
Conservatories / porches	None.
Conservatories / porches	Notie.
Communal areas	Circulation areas visually inspected.
	Access to all flats is via a mutual close and stairwell which benefits from a door entry security system.
0	
Garages and permanent outbuildings	Visually inspected.

Outside areas and houndaries	Visually inspected.	
Outside areas and boundaries		
	To the rear is a small slabbed courtyard bounded by substantial stone and harled retaining walls with metal railing feature.	
Ceilings	Visually inspected from floor level.	
	Ceilings are of plasterboard construction. Surfaces are papered	
	and painted, and there is PVC cladding within the kitchen and shower room.	
Internal walls	Visually inspected from floor level.	
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.	
	Internal partitions are of timber stud and plasterboard. Surfaces have been papered and painted, and there is a wet wall finish in the shower room.	
Floors including sub floors	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.	
	Floors are of suspended timber overlaid in chipboard.	
	Due to fitted floor coverings throughout no inspection was at all	
	possible of the flooring.	
Internal joinery and kitchen fittings	Built-in cupboards were looked into but no stored items were moved.	
	Kitchen units were visually inspected excluding appliances.	
	Base and wall kitchen fitments.	
	Internal doors are of timber panel design.	
Chimney breasts and fireplaces	None.	
Internal decorations	Visually inspected.	
	Papered and painted finish throughout.	
Cellars	None.	
Electricity	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.	

Gas	None.
Water, plumbing, bathroom fittings	Visual inspection of the accessible pipework, water tanks,
water, plumbing, bathroom fittings	cylinders and fittings without removing any insulation.
	No tests whatsoever were carried out to the system or appliances.
	Mains supply of water and plumbing, where seen, is of copper and PVC.
	Sanitary fittings comprise a modern three piece shower room suite.
Heating and hot water	Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.
	No tests whatsoever were carried out to the system or appliances.
	Partial space heating is provided by means of electric storage heaters within the hall, kitchen and both bedrooms, and there is a fan heater in the shower room.
	Hot water is assumed to be heated by an electric immersion heater as the tank is apparently boxed in within the attic. There is an Instant 7 electric heater to the kitchen sink and an electric shower.
Drainage	Drainage covers etc. were not lifted.
	Neither drains nor drainage systems were tested.
	Assumed to be connected to the main sewer.
Fire, smoke and burglar alarms	Visually inspected.
	No tests whatsoever were carried out to the system or appliances.
	Smoke detectors are fitted and there is a door entry security system serving the tenement.
Any additional limits to inspection	For flats / maisonettes
	Only the subject flat and internal communal areas giving access to the flat were inspected.
	If the roof space or under-building / basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection was possible, the surveyor will assume that there are no defects that will have a material effect on the valuation.
	The building containing the flat, including any external communal areas, was visually inspected only to the extent that the surveyor is able to give an opinion on the general condition and standard of maintenance.

The subjects were vacant at the time of inspection.

Due to fitted floor coverings throughout no inspection was at all possible of the flooring.

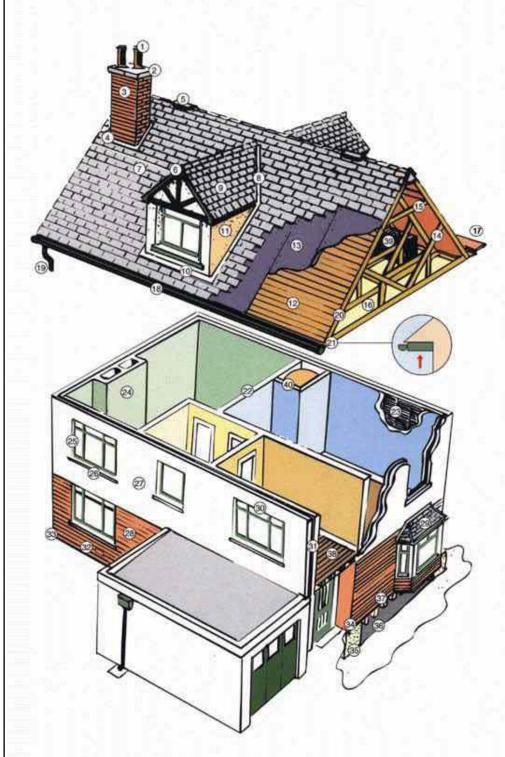

Only random windows were opened/tested and some were locked at the time of inspection.

Only a limited head and shoulders inspection was possible of the attic over the subject flat via a hatch in the hallway due to the extent of the insulation laid over the joists and only a limited head and shoulders inspection was possible of the small void over the mutual stairwell. No access was gained to the west side as this is via a separate dwelling.

The hot water tank was unseen and appears to be boxed in within the attic.

An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor. If it exists removal must be undertaken in a controlled manner by specialist contractors. This can prove to be expensive.

2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	

Structural movement		
Repair category	2	
Notes	There is evidence of settlement/movement having affected the building reflected by cracking to the stonework on the front elevation, cracking/movement at eaves level and a general undulation to the gable. This cracking has obviously occurred since the tenement was refurbished in 1996 and it is not possible to say that further significant movement will not occur. Further movement would seem unlikely but from a single inspection cannot be positively established. Maintenance re pointing works require to be carried out to prevent the possibility of any further deterioration and the situation monitored. Further advice should be obtained.	

Dampness, rot and infestation	
Repair category	1
Notes	Extensive timber specialist remedial works have been carried out within the roof voids presumably at the time of refurbishment. A copy of all relevant reports, specifications and guarantees should be obtained and checked in order to establish the full extent of the works and the adequacy of the guarantees. If such guarantees cannot be found or do not exist it is recommended that further specialist advice be obtained.

Chimney stacks	
Repair category	-
Notes	Not applicable.

Roofing including roof space		
Repair category	2	
Notes	There are a few slipped and broken slates which will require to be overhauled and replaced as necessary and the ridge plate is lifting.	

In view of the age and nature of the coverings the need for regular maintenance and repair of a mutual nature should be envisaged. Further advice should be obtained from a firm of roofing contractors to fully ascertain the condition of all coverings.
There is evidence of some staining to the sarking in the attic not uncommon in a roof of this age.

Rainwater fittings	
Repair category	2
Notes	Vegetation growth in front and rear gutters.

Main walls	
Repair category	2
Notes	There is evidence of settlement/movement having affected the building reflected by cracking to the stonework on the front elevation, cracking/movement at eaves level and a general undulation to the gable. This cracking has obviously occurred since the tenement was refurbished in 1996 and it is not possible to say that further significant movement will not occur. Further movement would seem unlikely but from a single inspection cannot be positively established. Maintenance re pointing works require to be carried out to prevent the possibility of any further deterioration and the situation monitored. Further advice should be obtained. Harling is bossed, that is improperly keyed, and although intact at the present time repairs should be envisaged in the medium term.
	Cracked rendering around window bands.

Windows, external doors and joinery	
Repair category	2
Notes	Windows are weathered with timbers drying out and there is missing pointing around the frames particularly at the front and decay to the lounge frame. These windows are of an age where increased maintenance should be anticipated to sealed units, frames and locking mechanisms. Further advice should be obtained. The entrance door is slightly ill fitting.

External decorations	
Repair category	2
Notes	External stain/painter work to the windows and mutual eaves is weathered, requiring renewal.

Conservatories/porches	
Repair category	-
Notes	Not applicable.

Communal areas	
Repair category	1
Notes	Cracked pane to rear door of close.

Garages and permanent outbuildings	
Repair category	1
Notes	No immediate action or repair needed.

Outside areas and boundaries	
Repair category	2
Notes	Vegetation growth, some movement and defective pointing affecting stone rubble mutual boundary walls particularly evident on the outside face. Harling is also bossed and flaking. Vegetation growth and uneven slabs in courtyard.

Ceilings	
Repair category	1
Notes	No immediate action or repair needed.

Internal walls	
Repair category	1
Notes	Slight internal shrinkage/movement reflected by plaster cracking and pulling of wallpaper at partitions. This is not uncommon in this type of refurbished tenement flat.

Floors including sub-floors	
Repair category	1
Notes	Loose flooring in Bedroom 1. It will be appreciated that due to fitted floor coverings throughout no inspection was at all possible of the floors.

Internal joinery and kitchen fittings		
Repair category	1	
Notes	General wear and tear to kitchen fitments.	

Chimney breasts and fireplaces	
Repair category	-
Notes	Not applicable.

Internal decorations	
Repair category	1
Notes	No immediate action or repair needed.

Cellars	
Repair category	-
Notes	Not applicable.

Electricity	
Repair category	2
Notes	Exposed wiring to socket in the lounge requires to be checked and made good. The Institute of Electrical Engineers recommends that inspections and testings are undertaken at least every ten years and on a change of occupancy. It should be appreciated that only the most recently constructed or rewired properties will have installations which fully comply with IEE Regulations.

d Gas	
Repair category	-
Notes	Not applicable.

Water, plumbing and bathroom fittings	
Repair category	1
Notes No immediate action or repair needed.	

Heating and hot water	
Repair category	1
Notes At the time of inspection the heating was not in operation nor was it checked tested.	

Drainage	
Repair category	1
Notes All foul and surface water drainage is assumed to be connected to the main p sewer. The system was not tested.	

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

Category 1

No immediate action or repair is needed.

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. Accessibility information

Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	Second
2. Are there three steps or fewer to a main entrance door of the property?	Yes No X
3. Is there a lift to the main entrance door of the property?	Yes No X
4. Are all door openings greater than 750mm?	Yes No X
5. Is there a toilet on the same level as the living room and kitchen?	Yes X No
6. Is there a toilet on the same level as a bedroom?	Yes X No
7. Are all rooms on the same level with no internal steps or stairs?	Yes X No
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes X No

4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

It is understood that the tenement building was extensively refurbished and modernised around 1996 at which time the present layout was formed. Extensive timber specialist remedial works were carried out evident by extensive new timbers within the attic. A copy of all relevant reports, specifications and guarantees should be obtained and checked in order to assess the full extent of the works and the adequacy of the guarantees. If such reports cannot be found or do not exist or out of date then further advice should be obtained from a reputable timber specialist firm.

The subjects form part of a tenement block and it has been assumed that maintenance/repair costs of the common parts of the building will be shared on an equitable basis with adjoining proprietors. It is therefore assumed that the cost of repairs detailed within the report will be apportioned accordingly although exact liability should be confirmed.

Where defects or repairs have been identified within this report it is recommended that, prior to entering into any legally binding sale or purchase contract, further specialist or contractors advice and estimates should be obtained to establish the implications, if any, on a potential offer to purchase or the sale price likely to be achieved for the property.

Estimated reinstatement cost for insurance purposes

For Reinstatement Cost Assessment purposes it is recommended that the subjects be insured for a sum of not less than £175,000 (ONE HUNDRED AND SEVENTY FIVE THOUSAND POUNDS STERLING).

This figure is the estimate of the cost of rebuilding the premises and bears no direct relationship to the current market value.

Valuation and market comments

Having considered matters, taking account of our general observations on site, we are of the opinion that the current market value of the subjects in their present condition and with the benefit of full vacant possession may be fairly stated in the capital sum of £67,000 (SIXITY SEVEN THOUSAND POUNDS STERLING).

General Remarks

The subjects comprise a purpose built second floor flat forming part of a three storey end terraced tenement situated in a mixed residential/commercial area fronting a busy section of Arbroath Road near its junction with Princes Street and Albert Street. There are commercial premises at ground floor level currently trading as an opticians, hair salon and bakers, and excellent primary facilities can be found in Dundee city centre approximately three quarters of a mile to the south west.

Externally the general condition of the property appears consistent with age and type of construction, but some works of repair and maintenance are required. Elements are ageing requiring attention.

There is evidence of settlement/movement having affected the building reflected by cracking to the stonework on the front elevation, cracking/movement at eaves level and a general undulation to the gable. This cracking has obviously occurred since the tenement was refurbished in 1996 and it is not possible to say that further significant movement will not occur. Further movement would seem unlikely but from a single inspection cannot be positively established. Maintenance re pointing works require to be carried out to prevent the possibility of any further deterioration and the situation monitored. Further advice should be obtained.

During the inspection defects were noted which are commonly found in a tenement property of this age and type and these should be capable of remedy by maintenance and repair.

The subjects form part of a tenement block and it has been assumed that maintenance/repair costs of the common parts of the building will be shared on an equitable basis with adjoining proprietors. It is therefore assumed that the cost of repairs detailed within the report will be apportioned accordingly although exact liability should be confirmed.
