# B. Kods. 150

# **Energy Performance Certificate**

### Address of dwelling and other details

FLAT 3, 37 NEW STREET, ROTHES, ABERLOUR, AB38 7BQ Dwelling type: Name of approved organisation: Membership number: Date of certificate: Reference number: Type of assessment: Total floor area: Main type of heating and fuel: Top-floor flat RICS Protocol for Scotland RICS856976 14 April 2011 0170-2009-4140-9099-1711 RdSAP, existing dwelling 64 m<sup>2</sup> Room heaters, electric

#### This dwelling's performance ratings

This dwelling has been assessed using the RdSAP 2005 methodology. Its performance is rated in terms of the energy use per square metre of floor area, energy efficiency based on fuel costs and environmental impact based on carbon dioxide (CO<sub>2</sub>) emissions. CO<sub>2</sub> is a greenhouse gas that contributes to climate change.

Energy Efficiency Rating			Environmental Impact (CO2) Rati	ng	
	Current	Potential		Current	Potential
Very energy efficient - lower running costs			Very environmentally friendly - lower CO2 emissions		
(92 plus) <b>A</b>			(92 plus)		
(81-91) <b>B</b>			(81-91)		
(69-80)			(69-80)		
(55-68)			(55-68) D		
(39-54)			(39-54)		
(21-38)			(21-38)	26	31
(1-20)	1	6	(1-20) G		
Not energy efficient - higher running costs	1		Not environmentally friendly - higher CO <sub>2</sub> emissions		
Scotland	EU Direc 2002/91		Scotland	EU Direc 2002/91	

The energy efficiency rating is a measure of the overall efficiency of a home. The higher the rating the more energy efficient the home is and the lower the fuel bills are likely to be.

The environmental impact rating is a measure of a home's impact on the environment in terms of carbon dioxide (CO<sub>2</sub>) emissions. The higher the rating the less impact it has on the environment.

Approximate current energy use per square metre of floor area: 770 kWh/m<sup>2</sup> per year

Approximate current CO2 emissions: 116 kg/m² per year

## Cost effective improvements

Below is a list of lower cost measures that will raise the energy performance of the dwelling to the potential indicated in the tables above. Higher cost measures could also be considered and these are recommended in the attached energy report.

1 Increase loft insulation to 270 mm

2 Add additional 80 mm jacket to hot water cylinder

### A full energy report is appended to this certificate

Remember to look for the energy saving recommended logo when buying energy-efficient products It's a quick and easy way to identify the most energy-efficient products on the market.

Information from this EPC may be given to the Energy Saving Trust to provide advice to householders on financial help available to improve home energy efficiency.

# N.B. THIS CERTIFICATE MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED VERSION
