Energy Performance Certificate

Address of dwelling and other details

Ashley Lodge 253 Great Western Road Aberdeen **AB10 6PP**

Dwelling type: Name of protocol: Membership number: Date of certificate: Total floor area: Main type of heating and fuel: Boiler and radiators, mains gas

Ground-floor flat N/A N/A 11 November 2014 86 m²

This dwelling has been assessed using the SAP 2009 methodology. Its performance is rated in terms of the energy use per square metre of floor area, energy efficiency based on fuel costs and environmental impact based on carbon dioxide (CO2) emissions. Carbon dioxide is a greenhouse gas that contributes to climate change.

The energy efficiency rating is a measure of the overall efficiency of a home. The higher the rating the more energy efficient the home is and the lower the fuel bills are likely to be.

Environmental Impact (CO ₂) Rating		
	Current	Potential
Very environmentally friendly - lower CO2 emissions		
(92-100) 🗛		
(81-91)	87	87
(69-80)		
(55-68) D		
(39-54)		
(21-38)		
(1-20) G		
Not environmentally friendly - higher CO ₂ emissions	;	
Scotland	EU Directive 2002/91/EC	

The environmental impact rating is a measure of a Home's impact on the environment in terms of Carbon dioxide (CO₂) emissions. The higher the Rating the less impact it has on the environment.

Approximate current energy use per square metre of floor area: 77 kWh/m² per year Approximate current CO2 emissions: 15 kg/m2 per year

Below is a list of lower cost measures that will raise the energy performance of the dwelling to the potential indicated in the tables above.
