

FLAT 3 82 BON-ACCORD STREET ABERDEEN AB11 6EJ

Home Report

Services provided by DM Hall include:

- Architectural Planning and Drawing
- Building Regulation Reports
- Building Surveying
- Business Appraisal, Valuation and Sales
- Commercial Agency Sales, Lettings and Acquisitions
- Commercial Property Valuation and Appraisal
- Energy Performance Certificates Domestic and Non-domestic
- Property Enquiry Certificates and Legal Searches
- Property Management
- Rating
- Rent Reviews
- Residential Development Appraisals

For more information on any of the above services please visit us at www.dmhall.co.uk or phone 0131 477 6000

Energy Performance Certificate

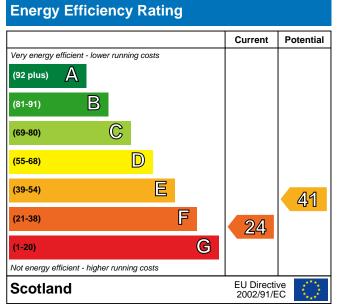

Energy Performance Certificate

Address of dwelling and other details

FLAT 3 82 BON-ACCORD STREET ABERDEEN AB11 6EJ	Dwelling type: Name of approved organisation: Membership number: Date of certificate: Reference number: Type of assessment: Total floor area: Main type of heating and fuel:	Top-floor flat RICS RICS061461 31 August 2011 0120-2281-8080-9529-7001 RdSAP, existing dwelling 35 m ² Room heaters, electric
--	---	---

This dwelling's performance ratings

This dwelling has been assessed using the RdSAP 2009 methodology. Its performance is rated in terms of the energy use per square metre of floor area, energy efficiency based on fuel costs and environmental impact based on carbon dioxide (CO_2) emissions. CO_2 is a greenhouse gas that contributes to climate change.

The energy efficiency rating is a measure of the overall efficiency of a home. The higher the rating the more energy efficient the home is and the lower the fuel bills are likely to be. Environmental Impact (CO₂) Rating Current Potential Very environmentally friendly - lower CO2 emissions A (92 plus) B (81-91) C (69-80) D (55-68) E 47 (39-54) 34 F (21-38) G (1-20) Not environmentally friendly - higher CO₂ emissions EU Directive 2002/91/EC Scotland

The environmental impact rating is a measure of a home's impact on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating the less impact it has on the environment.

Approximate current energy use per square metre of floor area: 727 kWh/m² per year

Approximate current CO₂ emissions: 129 kg/m² per year

Cost effective improvements

Below is a list of lower cost measures that will raise the energy performance of the dwelling to the potential indicated in the tables above. Higher cost measures could also be considered and these are recommended in the attached energy report.

- 1 Increase loft insulation to 270 mm
- 2 Add additional 80 mm jacket to hot water cylinder
- 3 Low energy lighting for all fixed outlets

A full energy report is appended to this certificate

Remember to look for the energy saving recommended logo when buying energy-efficient products. It's a quick and easy way to identify the most energy-efficient products on the market.

Information from this EPC may be given to the Energy Saving Trust to provide advice to householders on financial help available to improve home energy efficiency.

N.B. THIS CERTIFICATE MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED VERSION

Energy Report

The Energy Performance Certificate and Energy Report for this dwelling were produced following an energy assessment undertaken by a member of RICS. This is an organisation which has been approved by the Scottish Ministers. The certificate has been produced under the Building (Scotland) Amendment Regulations 2006 and a copy of the certificate and this energy report have been lodged on a national register.

Assessor's name:	Laurence Neil
Company name/trading name:	D M Hall
Address:	259, Union Street, Aberdeen, AB11
Phone number: Fax number: E-mail address: Related party disclosure:	6BR 01224 594 172 01224 574 615 laurence.neil@dmhall.co.uk No related party

Estimated energy use, carbon dioxide (CO₂) emissions and fuel costs of this home

	Current	Potential
Energy use	727 kWh/m² per year	525 kWh/m² per year
Carbon dioxide emissions	4.5 tonnes per year	3.3 tonnes per year
Lighting	£42 per year	£21 per year
Heating	£809 per year	£564 per year
Hot water	£201 per year	£175 per year

The figures in the table above have been provided to enable prospective buyers and tenants to compare the fuel costs and carbon emissions of one home with another. To enable this comparison the figures have been calculated using standardised running conditions (heating periods, room temperatures, etc.) that are the same for all homes, consequently they are unlikely to match an occupier's actual fuel bills and carbon emissions in practice. The figures do not include the impacts of the fuels used for cooking or running appliances, such as TV, fridge etc.; nor do they reflect the costs associated with service, maintenance or safety inspections. Always check the certificate date because fuel prices can change over time and energy saving recommendations will evolve.

About the building's performance ratings

The ratings on the certificate provide a measure of the building's overall energy efficiency and its environmental impact, calculated in accordance with a national methodology that takes into account factors such as insulation, heating and hot water systems, ventilation and fuels used.

Not all buildings are used in the same way, so energy ratings use 'standard occupancy' assumptions which may be different from the specific way you use your home.

Buildings that are more energy efficient use less energy, save money and help protect the environment. A building with a rating of 100 would cost almost nothing to heat and light and would cause almost no carbon emissions. The potential ratings in the certificate describe how close this building could get to 100 if all the cost effective recommended improvements were implemented.

About the impact of buildings on the environment

One of the biggest contributors to global warming is carbon dioxide. The way we use energy in buildings causes emissions of carbon. The energy we use for heating, lighting and power in homes produces over a guarter of the UK's carbon dioxide emissions and other buildings produce a further one-sixth.

The average household causes about 6 tonnes of carbon dioxide every year. Adopting the recommendations in this report can reduce emissions and protect the environment. You could reduce emissions even more by switching to renewable energy sources. In addition there are many simple everyday measures that will save money, improve comfort and reduce the impact on the environment. Some examples are given at the end of this report.

Summary of this home's energy performance related features

The table below gives an assessment of the key individual elements that have an impact on this home's energy and environmental performance. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the physical condition of any element. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology based on age and type of construction.

Flomont	Description	Current pe	rformance
Element	Description	Energy Efficiency	Environmental
Walls	Granite or whin, as built, no insulation (assumed) Timber frame, as built, partial insulation (assumed)	★☆☆☆☆ ★★★☆☆	$\begin{array}{c} \bigstar & \updownarrow & \Diamond & \diamond \\ \bigstar & \bigstar & \bigstar & \diamond & \diamond \end{array}$
Roof	Pitched, no insulation Flat, limited insulation (assumed)	★☆☆☆☆ ★☆☆☆☆☆	$\begin{array}{c} \bigstar & \updownarrow & \Diamond & \Diamond & \Diamond \\ \bigstar & \updownarrow & \Diamond & \Diamond & \Diamond \end{array}$
Floor	(other premises below)	-	-
Windows	Partial double glazing	★★☆☆☆	$\bigstar\bigstar \bigstar \pounds \bigstar$
Main heating	Room heaters, electric	★☆☆☆☆	$\bigstar \And \And \And \checkmark$
Main heating controls	No thermostatic control of room temperature	★★☆☆☆	$\bigstar\bigstar \Leftrightarrow \Leftrightarrow \Leftrightarrow$
Secondary heating None		-	-
Hot water	Electric immersion, standard tariff	* ☆ ☆ ☆ ☆	★☆☆☆☆
Lighting No low energy lighting		★☆☆☆☆	★☆☆☆☆
Current energy efficiency rating		F 24	
Current environmental impact (CO_2) rating			F 34

Low and zero carbon energy sources

These are sources of energy (producing or providing electricity or hot water) which emit little or no carbon dioxide into the atmosphere. There are none applicable to this home.

Renewable Heat Incentive

You could receive 20 years of RHI payments and help reduce carbon emissions by replacing your existing heating system with one that generates renewable heat and, where appropriate, having your loft insulated to 150 mm and cavity walls filled. The energy required for space and water heating shown below would form the basis of the payments. The Department of Energy and Climate Change has up-to date information on technologies supported and the support levels at www.decc.gov.uk/rhi.

This dwelling: Loft insulation less than 150 mm, Cavity walls not present

Heat demand for RHI	Existing dwelling	With loft insulation only	With cavity insulation only	With loft and cavity insulation
Space heating (kWh per year)	7502	5291	_	_
Water heating (kWh per year)	1667			

Further information about Energy Performance Certificates and Energy Reports will be found under Frequently Asked Questions at www.energysavingtrust.org.uk/epc-faq.

E 46

Recommended measures to improve this home's energy performance

The measures below are cost effective. The performance ratings after improvement listed below are cumulative, that is they assume the improvements have been installed in the order that they appear in the table. However you should check the conditions in any covenants, warranties or sale contracts, and whether any legal permissions are required such as a building warrant, planning consent or listed building restrictions. The indicative costs are representative for most properties but may not apply in a particular case.

		Typical savings per year	Ratings after improvement	
Lower cost measures	Indicative cost		Energy efficiency	Environmental impact
1 Increase loft insulation to 270 mm	£100 - £300	£262	E 39	E 46
2 Add additional 80 mm jacket to hot water cylinder	£15 - £30	£18	E 40	E 46
3 Low energy lighting for all fixed outlets	£18	£12	E 41	E 47
Sub-total		£292		
Higher cost measures				
4 Fan assisted storage heaters and dual immersion cylinder	£400 - £1,000	£356	D 68	E 46
Total		£648		
Potential energy efficiency rating			D 68	

Potential environmental impact (CO₂) rating

Further measures to achieve even higher standards

The further measures listed below should be considered in addition to those already specified if aiming for the highest possible standards for this home. Some of these measures may be cost-effective when other building work is being carried out such as an alteration, extension or repair. Also they may become cost-effective in the future depending on changes in technology costs and fuel prices. However you should check the conditions in any covenants, warranties or sale contracts, and whether any legal permissions are required such as a building warrant, planning consent or listed building restrictions. The indicative costs are representative for most properties but may not apply in a particular case.

5 50 mm internal or external wall insulation	£5,500 - £14,500	£23	C 70	E 48
Enhanced energy efficiency rating			C 70	
Enhanced environmental impact (CO ₂) rating			E 48

Improvements to the energy efficiency and environmental impact ratings will usually be in step with each other. However, they can sometimes diverge because reduced energy costs are not always accompanied by a reduction in carbon dioxide (CO_2) emissions.

About the cost effective measures to improve this home's performance ratings

If you are a tenant, before undertaking any work you should check the terms of your lease and obtain approval from your landlord if the lease either requires it, or makes no express provision for such work.

Lower cost measures

These measures are relatively inexpensive to install and are worth tackling first. The indicative costs of measures included earlier in this EPC include the costs of professional installation in most cases. Some of them may be installed as DIY projects. DIY is not always straightforward, and sometimes there are health and safety risks, so take advice before carrying out DIY improvements.

1 Loft insulation

Loft insulation laid in the loft space or between roof rafters to a depth of at least 270 mm will significantly reduce heat loss through the roof; this will improve levels of comfort, reduce energy use and lower fuel bills. Insulation should not be placed below any cold water storage tank, any such tank should also be insulated on its sides and top, and there should be boarding on battens over the insulation to provide safe access between the loft hatch and the cold water tank. The insulation can be installed by professional contractors but also by a capable DIY enthusiast. Loose granules may be used instead of insulation quilt; this form of loft insulation can be blown into place and can be useful where access is difficult. The loft space must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about loft insulation and details of local contractors can be obtained from the National Insulation Association

(www.nationalinsulationassociation.org.uk). It should be noted that building standards may apply to this work.

2 Hot water cylinder insulation

Increasing the thickness of existing insulation by adding an 80 mm cylinder jacket around the hot water cylinder will help maintain the water at the required temperature; this will reduce the amount of energy used and lower fuel bills. The jacket should be fitted over the top of the existing foam insulation and over any thermostat clamped to the cylinder. Hot water pipes from the hot water cylinder should also be insulated, using pre-formed pipe insulation of up to 50 mm thickness, or to suit the space available, for as far as they can be accessed to reduce losses in summer. All these materials can be purchased from DIY stores and installed by a competent DIY enthusiast.

3 Low energy lighting

Replacement of traditional light bulbs with energy saving recommended ones will reduce lighting costs over the lifetime of the bulb, and they last up to 12 times longer than ordinary light bulbs. Also consider selecting low energy light fittings when redecorating; contact the Lighting Association for your nearest stockist of Domestic Energy Efficient Lighting Scheme fittings.

Higher cost measures

4 Fan assisted storage heaters

Modern storage heaters are less expensive to run than the direct acting, on-peak heating system in the property. A dual-rate electricity supply is required to provide the off-peak electricity that these heaters use; this is easily obtained by contacting the energy supplier. Ask for a quotation for fan-assisted heaters with automatic charge control. A dual-immersion cylinder, which can be installed at the same time, will provide cheaper hot water than the system currently installed. Installations should be in accordance with the national wiring standards. Building regulations may apply to this work, so it is best to obtain advice from your local authority building standards department and from a qualified electrical heating engineer. Ask the heating engineer to explain the options, which might also include switching to other forms of electric heating.

About the further measures to achieve even higher standards

Further measures that could deliver even higher standards for this home. You should check the conditions in any covenants, planning conditions, warranties or sale contracts before undertaking any of these measures. If you are a tenant, before undertaking any work you should check the terms of your lease and obtain approval from your landlord if the lease either requires it, or makes no express provision for such work.

5 Internal or external wall insulation

Solid wall insulation involves adding a layer of insulation to either the inside or the outside surface of the external walls, which reduces heat loss and lowers fuel bills. As it is more expensive than cavity wall insulation it is only recommended for walls without a cavity, or where for technical reasons a cavity cannot be filled. Internal insulation, known as dry-lining, is where a layer of insulation is fixed to the inside surface of external walls; this type of insulation is best applied when rooms require redecorating and can be installed by a competent DIY enthusiast. External solid wall insulation is the application of an insulant and a weather-protective finish to the outside of the wall. This may improve the look of the home, particularly where existing brickwork or rendering is poor, and will provide long-lasting weather protection. Further information can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk). It should be noted that planning permission might be required and that building standards may apply to this work.

What can I do today?

Actions that will save money and reduce the impact of your home on the environment include:

- Ensure that you understand the dwelling and how its energy systems are intended to work so as to obtain the maximum benefit in terms of reducing energy use and CO₂ emissions.
- If you have a conservatory or sunroom, avoid heating it in order to use it in cold weather and close doors between the conservatory and dwelling.
- Check that your heating system thermostat is not set too high (in a home, 21°C in the living room is suggested) and use the timer to ensure you only heat the building when necessary.
- Make sure your hot water is not too hot a cylinder thermostat need not normally be higher than 60°C.
- Turn off lights when not needed and do not leave appliances on standby. Remember not to leave chargers (e.g. for mobile phones) turned on when you are not using them.
- Close your curtains at night to reduce heat escaping through the windows.
- If you're not filling up the washing machine, tumble dryer or dishwasher, use the half-load or economy programme. Minimise the use of tumble dryers and dry clothes outdoors where possible.
- Check the draught-proofing of windows and replace it if appropriate.
- If you have unused open chimneys consider blocking them off (making provision for a ventilation opening and a cowl on top of the chimney to avoid dampness).

For advice on how to take action and to find out about offers available to help make your home more energy efficient, call 0800 512 012 or visit www.energysavingtrust.org.uk.

chartered surveyors

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property¹.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in the expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

¹ Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions. The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:-

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report² will be from information contained in the Report and the generic Mortgage Valuation Report.

² Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;

- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 1. <u>Category 3:</u> Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2. <u>Category 2:</u> Repairs or replacement requiring future attention, but estimates are still advised.
- 3. Category 1: No immediate action or repair is needed.

WARNING:

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value, the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	South-most top floor flat in an end terraced two storey and attic building containing five flats.
Accommodation	Hall, lounge, bedroom, kitchenette, shower room.
Gross internal floor area (m²)	35
Neighbourhood and location	The property is situated in a mainly flatted residential area of Aberdeen lying just to the south of the city centre. Locally, there are good shopping, educational and social facilities available and a city bus route operates nearby.
Age	130 years.
Weather	Dry and bright following a period of mixed weather.
Chimney stacks	Visually inspected with the aid of binoculars where appropriate.
	The chimneys are of stone construction with cement work and metalwork flashings.
Roofing including roof space	Sloping roofs were visually inspected with the aid of binoculars where appropriate.
	Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally.
	Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property.
FLAT 3, 82 BON-ACCORD STREET,	If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and

reasonable to do so.
The main roof is pitched and slated. There are large dormer projections to the front and rear which have slated elevations and flat roofs covered with felt. The top floor flats consume most of the roof space. A ceiling hatch over the top stair landing gives access to the remaining apex roof space. The space is restricted and a head and shoulders inspection was carried out. The roof is constructed of pitched timber rafters covered with timber sarking. There is evidence of underslating felt. There is no insulation material above the flat.

Rainwater fittings	Visually inspected with the aid of binoculars where appropriate. The fittings are cast iron.
Main walls	Visually inspected with the aid of binoculars where appropriate.
	Foundations and concealed parts were not exposed or inspected.

	The walls are substantial solid granite, pointed externally.
ľ	

Windows, external doors and joinery	Internal and external doors were opened and closed where keys were available.
	Random windows were opened and closed where possible.
	Doors and windows were not forced open.
	The windows are timber sash type and timber casement type. The front windows are single glazed and the rear windows are double glazed. Fascias and features are timber.

External decorations	Visually inspected.
	Stain/varnish finishes.

Conservatories / porches	None.

Communal areas	Circulation areas visually inspected.
	A communal entrance, hallway and timber stair gives access to the two flats on the upper ground floor and the two flats on the top floor. The lower ground floor flat has a separate entrance. There are stores in the common hall at upper ground floor level but these were all locked and were not inspected.

Garages and permanent outbuildings	None.
Outside areas and boundaries	Visually inspected.
	There is a forecourt which accommodates the access route to the lower ground floor flat and a set of stone steps up to the communal entrance door to the upper floor flats. There is a fairly large area of garden ground to the rear which the seller advised includes mutual areas. However, the only direct means of access from the building is through the lower ground floor flat. The means of access for the upper floor flats would be a remotely accessed pedestrian footpath leading to a gate at the rear of the site. This footpath is completely overgrown and is not currently accessible. As a result the rear garden was not accessed and a close inspection of the rear of the building was not possible.

Ceilings	Visually inspected from floor level.
	The ceilings are lined with plasterboard.

Internal walls	Visually inspected from floor level.
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
	The walls and partitions are lined with plasterboard. There are also timber linings on the gables in the lounge and bedroom.

Floors including sub floors	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.
	Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point.
	Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch.
	The flooring is hidden by floor coverings but appears to be of either chipboard sheets or timber floorboards laid across suspended timber joists.

Internal joinery and kitchen fittings	Built-in cupboards were looked into but no stored items were moved.
	Kitchen units were visually inspected excluding appliances.
	Internal doors are timber composite with a mock panel profile and timber famed and glazed. The kitchen is fitted with a range of base and wall cupboard units incorporating a stainless steel sink unit and built-in oven and hob.

Chimney breasts and fireplaces	Visually inspected.	
	No testing of the flues or fittings was carried out.	
	Any chimney breasts are now hidden from view and fireplaces have been removed.	
Internal decorations	Visually inspected	

Internal decorations	Visually inspected.
	Paper and paint finishes.

Cellars	None.
Electricity	Accessible parts of the wiring were visually inspected without

removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.
Mains supply. The meter and fuses are in the hall cupboard. The electrical system has 13 amp sockets.

Gas	None.

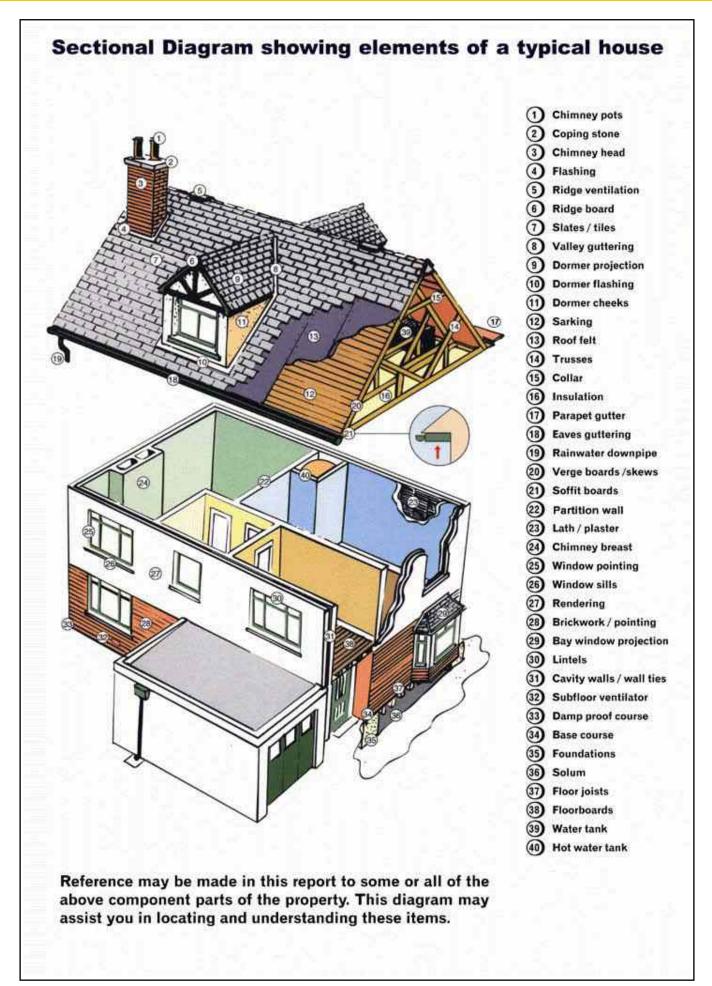

Т

Water, plumbing, bathroom fittings	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.
	No tests whatsoever were carried out to the system or appliances.
	Mains supply. The plumbing system, where visible, is of copper and plastic pipes. However, in a property of this age, there may be other types of pipework present but hidden from view. There is an insulated hot water tank in the roof space. The shower room is fitted with a white suite comprising pedestal basin, low level w.c. and shower cubicle.

Heating and hot water	Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.
	No tests whatsoever were carried out to the system or appliances.
	Space heating is by a permanently wired wall mounted electric heater in the lounge and a plug-in wall mounted electric panel in the bedroom. Hot water for domestic use is provided from an insulated copper hot water cylinder located in the lounge cupboard. The water is heated by an electric immersion heater.

Drainage	Drainage covers etc. were not lifted.	
	Neither drains nor drainage systems were tested.	
	Drainage is to the mains sewer.	
Fire, smoke and burglar alarms	Visually inspected.	
	No tests whatsoever were carried out to the system or appliances.	
	A smoke alarm is fitted.	
Any additional limits to inspection	For flats / maisonettes	
	Only the subject flat and internal communal areas giving access to the flat were inspected.	
	If the roof space or under-building / basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection was possible, the surveyor will assume that there are no defects that will have a material effect on the valuation.	
	The building containing the flat, including any external communal areas, was visually inspected only to the extent that the surveyor is able to give an opinion on the general condition and standard of maintenance.	
	The internal inspection was restricted by the presence of furnishings and fitted floor coverings throughout. The flat roofs on the dormers were not visible. The rear garden was not accessible and as a result the rear of the building was not visible externally apart from a distant view of a small part. External inspection of	

the building was further restricted by the presence of scaffolding on all elevations. I have not carried out an inspection for Japanese Knotweed and unless otherwise stated, for the purposes of the valuation, I have assumed that there is no Japanese Knotweed within the bounds of the property or in neighbouring properties.

2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	

Structural movement	
Repair category	1
Notes	No major evidence of movement was noted.

Dampness, rot and infestation	
Repair category	1
Notes	There is evidence of woodworm in the roof timbers. A specialist firm can carry out treatment if not done previously. There is some damp staining on roof timbers which the seller stated is old.As a generality properties of this age and type are always at risk from timber defects and these can be present in hidden areas without any obvious sign on the surface. A requirement for repairs can arise at any time.

Chimney stacks	
Repair category	1
Notes	The south-most stack is in the process of being repointed. There is open pointing to the north-most stack.

Roofing including roof space	
Repair category	2
Notes	There are a few broken, loose, and missing slates. Some of the slating was not visible. The parapet to the front has been patched with felt which would normally be regarded as an interim repair. Parapet gutters often become blocked and can cause maintenance problems. The flat roofs on the dormers were not visible. Flat roof coverings are known to have a limited life, requiring ongoing repair, maintenance and potentially replacement. Experience shows that leaks can manifest themselves with no warning. The seller stated that the felt on the front dormer was renewed in 2004/2005 and the felt on the rear dormer has been

renewed this year. There is woodworm and damp staining in the roof space as mentioned previously. There are ventilation pipes in the roof space which appear to be of asbestos cement. Whilst these remain in good condition and are left undisturbed, the current informed view is that they will represent no significant hazard to health. In the event of damage or disturbance potentially significant
costs to have them safely removed may be anticipated.

Rainwater fittings	
Repair category	1
Notes	No comment.

Main walls	
Repair category	1
Notes	The gable and rear walls are in the process of being repointed and scaffolding is in place. The repair category has been chosen on the assumption that this work will be satisfactorily completed prior to sale. Most of the rear wall was not visible.

Windows, external doors and joinery	
Repair category	2
Notes	The windows are of some age and display wear and tear.

External decorations	
Repair category	1
Notes	The decoration is weathered but the seller stated that redecoration is being carried out. The repair category has been chosen on the assumption that this work will be completed prior to sale.

Conservatories/porches	
Repair category	-
Notes	None.

Communal areas	
Repair category	1
Notes	No comment.

Garages and permanent outbuildings	
Repair category	-
Notes	None inspected.

Outside areas and boundaries	
Repair category	1
Notes	Close inspection of the rear was not possible.

Ceilings	
Repair category	1
Notes	There are patched areas which the seller stated was due to removal of light fittings.

Internal walls	
Repair category	1
Notes	No comment.

Floors including sub-floors	
Repair category	1
Notes	The flooring is all hidden from view by fitted floor coverings. The flooring generally felt firm underfoot.

Internal joinery and kitchen fittings	
Repair category	1
Notes	There is a glass door present and it is not possible to state whether safety glass has been used.

Chimney breasts and fireplaces	
Repair category	1
Notes	No comment.

Internal decorations	
Repair category	1
Notes	No comment.

Cellars	
Repair category	-
Notes	None.

Electricity	
Repair category	2
Notes	There are aspects of the electrical installation which may not satisfy current day needs such as the presence of fuses rather than circuit breakers and a broken fuse box cover. It is preferable to have electrical circuits upgraded by an N.I.C.E.I.C. registered electrician.

Gas	
Repair category	-
Notes	None.

F Water, plumbing and bathroom fittings	
Repair category	1
Notes	No comment.

Heating and hot water	
Repair category	1
Notes	No comment.

Drainage	
Repair category	1
Notes	No comment.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

Drainage	1

Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

Category 1

No immediate action or repair is needed.

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. Accessibility information

Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	Top floor
2. Are there three steps or fewer to a main entrance door of the property?	Yes No X
3. Is there a lift to the main entrance door of the property?	Yes No X
4. Are all door openings greater than 750mm?	Yes No X
5. Is there a toilet on the same level as the living room and kitchen?	Yes X No
6. Is there a toilet on the same level as a bedroom?	Yes X No
7. Are all rooms on the same level with no internal steps or stairs?	Yes X No
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes No X

4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

The property is listed Category C (S). The property has been the subject of alterations in the past including building the dormer extensions. These do not appear recent.

The seller stated that grants have been agreed to assist with the repairs currently underway. The valuation assumes that all works will be completed prior to sale and that no liability will fall on a purchaser.

Estimated reinstatement cost for insurance purposes

£120,000.

Valuation and market comments

The market value at the date of inspection is £112,000. This assumes that a purchaser is not liable for the cost of completing repairs currently underway. There has been a partial recovery in the market following the downturn although the market continues to fluctuate. Demand does exist and sales are taking place.

General Remarks

The property is situated in a mainly flatted residential area of Aberdeen lying just to the south of the city centre. All necessary amenities are within easy reach.

The property appeared to be generally in a condition consistent with its age and type. Some repair and maintenance works are required. The gable and rear walls are in the process of being repointed and the seller advised that this is being carried out with the benefit of grant aid. The seller also advised that the external decoration is to be renewed. The valuation assumes that all works will be completed prior to sale and that no liability will fall on a purchaser. The flat roofs on the dormers were not visible and such roofs do have a limited useful life. The rear garden was not accessible and as a result, the rear of the building was not fully visible externally.

The building is listed Category C (S). The property has been the subject of alterations in the past including building dormer extensions. These works do not appear recent.

Completion date of property questionnaire	24 August 2011	
---	----------------	--

Note for sellers

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the date of entry for the sale of your house, tell your solicitor or estate agent immediately.

Information to be given to prospective buyer(s)

1.	Length of ownership
	How long have you owned the property? Since December 2006
2.	Council tax
	Which Council Tax band is your property in? (Please circle) A B C D E F G H
3.	Parking
	What are the arrangements for parking at your property?
	(Please tick all that apply)
	Garage
	Allocated parking space
	• Driveway
	Shared parking
	On street
	• Resident permit
	• Metered parking
	Other (please specify):
4.	Conservation area
	Is your property in a designated Conservation Area (i.e. an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?

5.	Listed buildings					
	Is your property a Listed Building, or contained within one (i.e. a building recognised and approved as being of special architectural or historical interest)?	Yes / No				
6.	Alterations/additions/extensions					
a.	 (i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)? <u>If you have answered yes</u>, please describe below the changes which you have made: 					
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?	Yes / No				
	If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.					
	If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:					
b.	Have you had replacement windows, doors, patio doors or double glazing installed in your property?	Yes / No				
	If you have answered yes, please answer the three questions below:					
	(i) Were the replacements the same shape and type as the ones you replaced?	Yes / No				
	(ii) Did this work involve any changes to the window or door openings?	¥es / No				
	(iii) Please describe the changes made to the windows, doors or patio doors (with approximate dates when the work was completed):					
	I replaced all internal doors within the Property with doors of the same type and shape.					
	Please give any guarantees which you received for this work to your solicitor or es	state agent.				

7.	Central heating					
a.	Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property - the main living room, the bedroom(s), the hall and the bathroom).					
	If you have answered yes / partial - what kind of central heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas warm air).					
	Electric and oil filled radiators.					
	If you have answered yes, please answer the three questions below:					
b.	When was your central heating system or partial central heating system installed?	2007				
c.	Do you have a maintenance contract for the central heating system?	Yes / No				
	If you have answered yes, please give details of the company with which you have a maintenance contract:					
d.	When was your maintenance agreement last renewed? (Please provide the month and year).					
8.	Energy Performance Certificate					
	Does your property have an Energy Performance Certificate which is less than 10 years old?	¥es / No				
9.	Issues that may have affected your property					
a.	Has there been any storm, flood, fire or other structural damage to your property while you have owned it?	Yes / No				
	If you have answered yes, is the damage the subject of any outstanding insurance claim?	Yes / No				
b.	Are you aware of the existence of asbestos in your property?	Yes / No				
	If you have answered yes, please give details:					

).	Services			-6.45	
	Please tick which services are connected to your property and give details of supplier:				
	Services	Connected	Supplier		
	Gas / liquid petroleum gas				
	Water mains / private water supply	~	Aberdeen City Council		
	Electricity	✓	Scottish Hydro Electric		
	Mains drainage	✓	Aberdeen City Council		
	Telephone	✓	The line is in place but not con	nected	
	Cable TV / satellite				
	Broadband				
	Is there a septic tank system at yo	our property?		¥es / No	
	If you have answered yes, please a	answer the two	questions below:		
	(i) Do you have appropriate conse	nts for the discl	narge from your septic tank?	Yes / No / Don't know	
	(ii) Do you have a maintenance co	ntract for your s	septic tank?	Yes / No	
	If you have answered yes, please have a maintenance contract:	e give details of	the company with which you		

11.	Responsibilities for Shared or Common Areas					
a.	Are you aware of any responsibility to contribute to the cost of anything used jointly, such as the repair of a shared drive, private road, boundary, or garden area?	Yes / No / Den't Knew				
	If you have answered yes, please give details:					
b.	b. Is there a responsibility to contribute to repair and maintenance of the roof, common stairwell or other common areas?					
	If you have answered yes, please give details:					
	Their are five flats within the building. Four of these flats can be entered by the communal door. The fifth flat has a seperate entrance and is larger. The fifth flat requires to pay 50% for all communal repairs. The other four flats share equally in the remainding 50%. Flat three is therefore liable to pay a quarter of 50%.					
C.	Has there been any major repair or replacement of any part of the roof during the time you have owned the property?	Yes / No				
d.	Do you have the right to walk over any of your neighbours' property - for example to put out your rubbish bin or to maintain your boundaries?	Yes / No				
	If you have answered yes, please give details:					
е.	As far as you are aware, do any of your neighbours have the right to walk over your property, for example to put out their rubbish bin or to maintain their boundaries?	Yes / No				
	If you have answered yes, please give details:					
f.	As far as you are aware, is there a public right of way across any part of your property? (public right of way is a way over which the public has a right to pass, whether or not the land is privately-owned.)	Yes / No				
	If you have answered yes, please give details:					
12.	Charges associated with your property					
a.	Is there a factor or property manager for your property?	Yes / No				
	If you have answered yes, please provide the name and address, and give details of any deposit held and approximate charges:					

b.	Is there a common buildings insurance policy?	Yes / No / Den't Knew
	If you have answered yes, is the cost of the insurance included in your monthly/annual factor's charges?	Yes / No / Don't Know
C.	Please give details of any other charges you have to pay on a regular basis for the upkeep of common areas or repair works, for example to a residents' association, or maintenance or stair fund.	
13.	Specialist works	
a.	As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your property?	¥es / No
	If you have answered yes, please say what the repairs were for, whether you carried out the repairs (and when) or if they were done before you bought the property:	
b.	As far as you are aware, has any preventative work for dry rot, wet rot, or damp ever been carried out to your property?	Yes / No
	If you have answered yes, please give details:	
с.	If you have answered yes to 13(a) or (b), do you have any guarantees relating to this work?	Yes / No
	If you have answered yes, these guarantees will be needed by the purchaser and should be given to your solicitor as soon as possible for checking. If you do not have them yourself <u>please write below who has these documents</u> and your solicitor or estate agent will arrange for them to be obtained. You will also need to provide a description of the work carried out. This may be shown in the original estimate.	
	Guarantees are held by:	

14.	Guarantees						
a.	Are there any guarantees or warranties for an	y of the	following	:			
(i)	Electrical work	No	¥es	Don't know	With title doods	Lost	Cannot Answer*
(ii)	Roofing	No	¥es	Don't know	With title doods	Lost	Cannot Answer*
